## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,366,472 to Alina et al.

Regarding claims 1-2, Alina et al disclose a method of fastening an electromagnetic interference (EMI) shield (30/51) to a printed circuit board (34/54), the printed circuit board comprising a plurality of holes (slot), the EMI shield comprising a plurality of fasteners (56) corresponding to the plurality of holes of the printed circuit board, the method comprising: inserting the plurality of fasteners into the plurality of holes (slot Col. 2, lines 20-23) to securely fasten the EMI shield to the printed circuit board (Figs. 3/5).

Regarding claims 3-4, Figs. 3 and 5 show a height of the plurality of fasteners is no greater than a thickness of the circuit board and plurality of fasteners is joined to the plurality of holes by intrusion.

3. Claims 1-2 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 6.239,359 to Lilienthal, II et al.

Application/Control Number: 10/064,673

Art Unit: 3729

Regarding claims 1-2, Lilienthal, II et al disclose a method of fastening an electromagnetic interference (EMI) shield (22) to a printed circuit board (20), the printed circuit board comprising a plurality of holes (opening 72), the EMI shield comprising a plurality of fasteners (44/50/58/80) corresponding to the plurality of holes of the printed circuit board, the method comprising: inserting the plurality of fasteners into the plurality of holes (72) to securely fasten the EMI shield to the printed circuit board (Figs. 3/4/8/etc.).

Regarding claims 5 and 6, Figs. 10 or 12 shows the EMI shield further comprises a plurality of fixed fittings (58/80) used to fix the EMI shield to another structure and the plurality of fixed fittings is of a pushbutton structure (60/92).

Regarding claims 7 and 8, Figs. 6, 7 or 14 shows a height of the plurality of fasteners is greater than a thickness of the circuit board and after the plurality of fasteners is inserted into the plurality of holes, ends of the plurality of fasteners are bent under the circuit board (Notes that the prongs 46 or 98 are bent back to it normal sized after being bent to fit through the holes).

## Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donghai D. Nguyen whose telephone number is (703) 305-7859. The examiner can normally be reached on Monday-Friday (9:00-6:00).

Application/Control Number: 10/064,673 Page 4

Art Unit: 3729

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter D. Vo can be reached on (703) 308-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
